CADEN GAMACHE

SOFTWARE SOLUTIONS & AI-AUGMENTED DEVELOPMENT

mrcgamache@outlook.com
linkedin.com/in/caden-gamache
Moriarty, NM • Remote Ready

Full-Stack Developer with a proven track record of exceeding role expectations by engineering custom automation tools to modernize legacy workflows. I specialize in **AI-Augmented Development**, transforming manual processes into high-speed digital systems. Expert at identifying operational bottlenecks and building the software solutions necessary to eliminate them.

WORK HISTORY

Electrical Components Technician
OCT 2024 – PRESENT

Quell Corporation // Albuquerque, NM

- Proactively engineered a suite of full-stack browser tools to replace 30-year-old manual workflows.
- **Reduced processing time by 95%** (2 hours down to <5 mins) for complex engineering tasks.
- Built proprietary visualization tools to plot 72,000+ data points for instant EMI feedback.
- Developed a prototype automated transient solver to resolve critical hardware thermal surge limits.

IoT Systems Intern
MAY 2023 – JUNE 2023

CNM Ingenuity // Albuquerque, NM

- Developed C++ embedded firmware for multi-sensor integration on Particle Argon microcontrollers.
- Delivered end-to-end IoT solutions including custom 3D-printed enclosures for agricultural clients.

Architecture & Design Intern
FEB 2022 – MAY 2022

Sam Sterling Architecture // Albuquerque, NM

- Modernized the firm's website by restructuring Wix portfolio workflows, streamlining new project uploads and reducing administrative overhead.
- Utilized Revit and Lumion to create high-quality photorealistic renders for client approvals.
- Enhanced architectural visualizations by designing custom materials.

KEY SOFTWARE PROJECTS

Wonder Arcade
Vanilla ES6, PeerJS, Matter.js, p5.js, WebRTC

cgame1ten2.github.io/Arcade-Online/

Multiplayer platform with QR-controller sync. Features RTT-based lag equalization and manager-pattern architecture for packet routing.

EESeal® Builder
JavaScript, HTML5, CSS Grid, Chart.js

Launching 2026: Automated custom EMI filtering configuration tool for Quell/Powell Electronics. Maps EMI constraints to pinout descriptions with performance visuals.

Minecraft Skin Generator
Generative AI API, React Native

mc-skin-generator-sigma.vercel.app/

Web app using natural language processing to generate 3D-engine compatible game textures via generative AI.

AI WORKFLOW

Gemini | Prompt Iteration | Claude | Prompt Engineering | Grok | ChatGPT

CORE DEVELOPMENT

HTML5/CSS3 | JavaScript (ES6+) | React.js | Typescript | C++

ENGINEERING

SolidWorks | 3D Modeling | IoT | Laser Cutting | 3D Printing

FUNDAMENTAL

Microsoft Teams | Excel | Powerpoint

SOFT SKILLS

Leadership & Teamwork | Communication | Problem Solving | Learning Agility | Adaptability

EDUCATION

CNM Community College
AAS Arch Engineering Drafting
IoT Bootcamp Graduate
Dean's List (3.96 GPA)

AI METHODOLOGY (SOP)

01 Root-Cause Prompting: If code fails, I refresh and refine the prompt to solve logic at the instruction level rather than writing new prompts.

02 Consistency: This ensures a clean, unified logic stream and highly reproducible codebases.

Servant Leadership: I measure my professional success by the efficiency I create for my peers and the complexity I can remove from their daily workflows.

Continuous Iteration: Committed to the philosophy of "Learning by Doing." I treat every technical error as data for the next, more refined instruction.

AI Advocacy: I believe AI is a force multiplier, not a shortcut. I specialize in guiding models through prompt iteration to produce clean code output.
